VAPOR TECHNOLOGY ASSOCIATION ADDS OVER 70 NEW MEMBERS

WASHINGTON, DC – Today, the [Vapor Technology Association](#) announced that it has attracted over 70 new members since its late-January launch in Washington, DC. VTA serves as the leading advocate for manufacturers, wholesalers, suppliers, small business owners and entrepreneurs in the vapor technology industry who not only continue to develop new technologies for the benefit of public health, but also promote small businesses and job growth across the country.

In addition to Next Generation Labs, Intrepid Brands, VMR Products, Nicopure Labs, Gaiatrend USA and Tobacco Technology Inc., some new members include Purebacco USA and the Tennessee Smoke Free Association (TSFA), a leading advocacy group with a focus on Tobacco Harm Reduction through the use of personal vaporizers.

“VTA and its leadership bring a much-needed, fresh perspective to the industry and a responsible approach to the public policies that impact it,” said **Dimitris Agrafiotis, TSFA’s Executive Director**. “The Tennessee Smoke Free Association is committed to promoting greater public health through vapor products, and we will work hand-in-hand with VTA to fight proposed federal regulations that only serve to eliminate this anti-smoking alternative.”

“We are excited to hit the ground running with respected industry leaders like Dimitris Agrafiotis and the Tennessee Smoke Free Association which is dedicated to promoting a safer alternative to traditional tobacco products,” said **Tony Abboud, VTA’s National Legislative Director**. “With partners like TSFA, we will aggressively advocate on behalf of all segments of the industry at the federal and state levels, and fight back against organizations that – until now – have remained virtually unchecked in their propagation of misleading information about vapor products.”
