<sup>2</sup> Some columns may not add to 100% due to rounding. In the same way, percentages in "total" columns may be one point more or less than the sum of their parts due to rounding.

<sup>3</sup> The margin of error is calculated at +/- 4.0% at the 95% confidence level, meaning that in 19 out of 20 cases, the results obtained would differ by no more than two point eight percentage points in either direction if the entire adult population nationwide were to be surveyed. Margins of error for subgroups are higher.

31. The largest randomized control study on e-cigarettes in the U.S. published in 2023 by the Medical University of South Carolina Hollings Cancer Center, found that not only do flavored e-cigarettes help people quit, but they also helped people quit smoking cigarettes who had no intention of quitting. The lead author said, "No matter how we looked at it, those who got the e-cigarette product demonstrated greater abstinence and reduced harm as compared to those who didn't get it." After learning this, are you (ROTATED) more or less likely to support Biden's ban on flavored vaping products?
